# SIGN UP TO RECEIVE COMMUNITY ALERTS!!!

Residents of Plainfield Township, Wind Gap Borough and Pen Argyl Borough can now receive important, official information directly from the Slate Belt Regional Police Department through Nixle. Messages will be delivered by email, SMS text message, and over the web. Use the below widget to directly sign up for the Nixle system.

Information can be received online and through email. Residents can receive messages by phone as part of their text messaging plan- otherwise standard text message rates apply. The system is simple to use and provides an easy sign-up process. Register now and learn more at [www.nixle.com](http://www.nixle.com).

Nixle is built exclusively to provide secure and reliable communications. Its authenticated service connects city agencies to citizens in real-time, delivering geographically targeted information to residents.

Citizen questions about Nixle and its capabilities can be answered through our Frequently Asked Questions page found at [www.nixle.com/consumer-faqs/](http://www.nixle.com/consumer-faqs/). Should you need additional assistance, Nixle provides free citizens support. Email any questions to [support@nixle.com](mailto:support@nixle.com).

## 2019 ALPHA ROAD STORMWATER PROJECT

Wind Gap Borough has secured two Grants from Northampton County, Department of Community and Economic Development, through the Community Development Block Grant (CDBG) Program. Community Development Block Grants provide communities with resources to address a wide range of community development needs.

The project includes the road that is known as Upper Alpha Road from the intersection of Alpha Road and State Route 512, north to the intersection of Alpha Road and State Route 115.

The Alpha Road Stormwater Project will safely convey runoff waters through the Borough and will eliminate the pedestrian and traffic hazards as well as potential private property damage caused by undersized and deteriorating storm sewer inlets and pipes. The Borough does receive liquid fuels money from the State, but because of the age of the infrastructure and the rapid deterioration due to the harsh winter conditions over the last few years, these funds are not sufficient enough to allow the Borough to provide safe and adequate access through proper maintenance and reconstruction of our roads.

The Alpha Road Stormwater Project consists of replacing approximately 2,600 lineal feet of pipe, installing bicycle safety inlet grates, demolition and replacement of 1,000 feet of curbing, and installing two handicap ramps at the intersection of Alpha Road and State Route 115 along with paving the entire length of Upper Alpha Road.

The total cost of the project is estimated to be \$480,000. Community Development Block Grants awarded to the Borough include \$75,000 in 2017 and another \$115,000 in 2018. The balance of the project cost will be offset by State Liquid Fuels funds received from the Commonwealth of Pennsylvania.

In conjunction with this project, Wind Gap Borough Council will direct our Borough Engineer, Robert Collura Engineering, to complete a Traffic Study on Alpha Road. If the Traffic Study warrants restricting truck traffic then Borough Council can legally adopt an ordinance to limit the truck traffic on that portion of Alpha Road.

## COMMUNITY WIDE YARD SALE

JULY 5<sup>th</sup>, 6<sup>th</sup> AND 7<sup>th</sup>

These are Sales for residential purposes related to the household in the Borough wherein the Sale is being conducted and not for Commercial purposes. The Sales are restricted in length to forty-eight (48) hours (2 consecutive calendar days). The Sale will then be deemed a Transient Retail Business (\$25 per Day).

# United States<sup>®</sup> Census 2020

**We're Hiring - Apply Now**  
[www.2020census.gov/en/jobs](http://www.2020census.gov/en/jobs)

## JOIN THE 2020 CENSUS TEAM

The Census Bureau is hiring temporary employees for the 2020 Census. Our jobs offer weekly pay, competitive pay rates, flexible hours, and paid training. By joining the 2020 Census team, you can support your community while getting paid to do it.

## COMMUNITY GARDEN

Wind Gap Borough and Slate Belt Rising are collaborating to create a community garden in Wind Gap Borough Park at the corner of South Lehigh and East West streets. The Purpose of a Community Garden is to provide fresh produce and plants as well as contributing to the sense of community and connection to the environment and an opportunity for satisfying labor and neighborhood improvements.

As a resident of Wind Gap Borough, we encourage participation in this unique effort to further create a sense of community through gardening. Slate Belt Rising will offset the cost of materials and plants during the initial start-up of our garden this summer.

If you would like additional information, please visit our website at [www.windgap-pa.gov](http://www.windgap-pa.gov) or call the Borough Office at 610-863-7288 to become part of our gardening team!

*Future Garden Location*

# PAVILION RENTALS

## Spotted Lanternfly: Tips for Handling Yard Waste in Quarantined Areas

The invasive spotted lanternfly has been found in counties in southeastern Pennsylvania. We are trying to contain and control this pest with the goal of future eradication. A quarantine order is in place that prohibits the movement of any living life stage of this insect to areas outside the quarantined area. For information about identifying the spotted lanternfly, where it is known to exist, the quarantine order, and compliance, go to [extension.psu.edu/spotted-lanternfly](http://extension.psu.edu/spotted-lanternfly).

**Learn how to identify spotted lanternfly and report it.** Report any capture, photos, or sightings of this insect to [extension.psu.edu/spotted-lanternfly](http://extension.psu.edu/spotted-lanternfly) or 1-888-4BAD-FLY (1-888-422-3359).

**Know which counties are included in the quarantine order.** Additional counties will be added if new discoveries occur. Check [extension.psu.edu/spotted-lanternfly](http://extension.psu.edu/spotted-lanternfly) for the current quarantine map.

**Avoid moving this insect on woody plant debris (e.g., fallen trees or branches and tree trimmings) and any living plants, equipment, building materials, or other objects.** Businesses may avoid possible fines by obtaining a spotted lanternfly permit through the Pennsylvania Department of Agriculture (PDA). To obtain a permit, complete the training online at [extension.psu.edu/spotted-lanternfly](http://extension.psu.edu/spotted-lanternfly). This is a "train the trainer" course to train designated employees (usually an owner, manager, or supervisor) within a company on how to comply with the quarantine regulations. The designated employee must then train fellow employees. Plant nurseries, nursery stock dealers, and mulch producers should contact their plant

inspector for compliance information. In-person training and questions may be directed to [SLFPermit@PA.gov](mailto:SLFPermit@PA.gov).

**Inspect yard waste and other items and destroy egg masses.** Destroy egg masses by scraping and covering them in alcohol, crushing them, or burning them.

**Noncommercial residents should use the compliance checklist** when moving items from within the quarantined area to outside areas (see [extension.psu.edu/spotted-lanternfly](http://extension.psu.edu/spotted-lanternfly)).

**When working in the quarantined area, if possible chip all woody debris on-site** to no larger than 1-inch pieces in each of two dimensions. Even within the quarantined area, moving chips is a better practice than moving larger woody debris. Movement of fallen leaves is not regulated under the spotted lanternfly quarantine, but please check for and destroy any egg masses on leaf bags and containers.

**If you can, leave all chips or woody debris on-site.** The next best option is to take chips or debris to an organic materials recycler within the quarantined area.

**To kill viable insects or eggs in chipped material, the composting procedure below must be followed before moving material out of the quarantined area:**

1. Compost piles must be a minimum of 200 cubic yards.
2. Internal temperature at a depth of 18 inches must reach 140° F (60°C) for four continuous days.
3. After the interior of the pile is successfully heat treated, the exterior of the pile needs to be rotated to the center. Using a front-end loader or a bulldozer, remove the outer layer of the compost pile to a depth of 3 feet.
4. Start a second compost pile using the recently removed cover material as a core.
5. Cover this second compost pile by moving the core material from the first compost pile as a cover at least 3 feet deep.
6. Allow the second compost pile to remain undisturbed until the temperature reaches 140° F (60°C) for at least four continuous days.
7. After the chips have been successfully composted according to these directions, the resulting composted material meets compliance requirements.
8. Mulch being offered for sale and moved out of the quarantined area must be certified by PDA. Contact your regional plant inspector for information.

Penn State College of Agricultural Sciences research and extension programs are funded in part by Pennsylvania counties, the Commonwealth of Pennsylvania, and the U.S. Department of Agriculture.

**Did you know?**

Life in Wind Gap Borough is more affordable thanks to an agreement between our community and Waste Management's Grand Central Landfill.

Through the borough's neighboring municipality agreement, the landfill in 2018 provided the borough with \$259,302 in cash payments and provided the borough with free weekly waste collection and disposal service and every-other-week recycling collection.

The waste and recycling collection service is estimated to be worth about \$252,000. The combined value of the monetary and service benefits is \$511,302.

Waste Management and Grand Central Landfill are thankful to operate in this community and are proud of the many things we do to be a good neighbor. If you have questions about our business, please call us at 1-888-373-2917.
